North Carolina is changing all around us. Stretches of farmland are being swallowed by patches of development. Serene rural landscapes are being transformed as houses, schools and office park developments rise up to accommodate the growing population. If we are not careful, the North Carolina that we have become accustomed to will soon be unrecognizable.

Since 2002, our state has lost 6,000 farms and 300,000 acres of farmland to development. In 2004 alone, North Carolina lost 200,000 acres. Our rapidly increasing population indicates that this trend is likely to continue.

By the year 2030, the U.S. Census Bureau predicts that North Carolina's population will increase by 4 million people. On average, each new person entering our state requires two acres of housing, commercial and industrial development. That translates into 8 million acres changing uses.

As we look to the future, we must also look at who will be our next generation of farmers. The average N.C. farmer today is 56 years old. Younger generations are choosing business or corporate jobs in the cities, rather than choosing careers on the family farm. We need to encourage more young people to pursue agricultural careers.

As Commissioner of Agriculture, farmland preservation is my top priority. With 2 percent of the world currently feeding the other 98 percent, it is imperative that North Carolina retain its ability for reliable and wholesome food production. This is why I have led efforts to secure funding for farmland preservation, keep working lands in production, open new markets for farmers and encourage young people to consider agriculture as a potential career.

I believe research is a key component to a strong future in agriculture. The N.C. Department of

Agriculture and Consumer Services is proud to continue its 70-year history of partnership with N.C. State University and N.C. A&T State University through our research stations across the state. This partnership continually produces new and innovative techniques that improve farming operations.

We are also pleased that the Agricultural Development and Farmland Preservation Trust Fund received \$8 million in funding from the state legislature. This trust fund not only helps farmers, but it also helps maintain the natural resources that make this state a special and attractive place for us all to live.

In the 2007 Agricultural Statistics Book, you'll find hundreds of statistics that prove how essential agriculture is to our state. These numbers speak to North Carolina's agricultural capabilities, but they also strengthen my resolve to keep agriculture the number one industry in our state. I believe North Carolina will have a strong

future if we work together to preserve the farmland that supports us. Every person, whether they farm or not, has a vested interest in agriculture. This industry feeds us and fuels our economy. We must remain adaptive and innovative, and continue to value and respect our farmland and our agricultural heritage in order to remain a leading agricultural state.

Thank you,

Since 2002, North Carolina has lost more than 6,000 farms and 300,000 acres of farmland. This puts North Carolina in the unenviable position of leading the nation in farm loss.

Preserving working family farms is one of Agriculture Commissioner Steve Troxler's top priorities. In March 2005, he delivered his "Agricultural Development and Farmland Preservation Strategy" to the General Assembly. During that legislative session, the General Assembly passed House Bill 607 establishing the Agricultural Development and Farmland Preservation Trust Fund.

The purpose of the fund is to:

- * Support the purchase of agricultural conservation easements, including transaction costs.
- * Fund public and private enterprise programs that will promote profitable and sustainable farms by assisting farmers in developing and implementing plans for the production of food, fiber and value-added products, agritourism activities, marketing and sales of agricultural products produced on the farm, and other agriculture-related business activities.
- * Fund farmland conservation agreements targeted at the active production of food, fiber and other agricultural products.

The legislation also established a Trust Fund Advisory Committee to advise Commissioner Troxler on the prioritization and allocation of funds, the development of criteria for awarding funds, program planning, and other areas for the growth and development of family farms in North Carolina.

In the fall of 2006, the trust fund awarded its first grants to support projects aimed at agricultural development and farmland preservation.

STATISTICS PROGRAM

The North Carolina Field Office of USDA's National Agricultural Statistics Service compiles current and historic statistics concerning agriculture in the State. Where possible, information most often requested by farmers, the general public, and workers in government agencies are included.

Reporting of crop and livestock statistics is a service provided to farmers and others in the State by the National Agricultural Statistics Service of the U.S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture and Consumer Services.

The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. Thus, in 1919 the N.C. Department of Agriculture

entered into a cooperative agreement with the U.S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture and Consumer Services.

The North Carolina Field Office of USDA's National Agricultural Statistics Service publishes official statistics on crops, livestock, prices, and various other agricultural items. The most important reports and the approximate dates of releases are shown in the table below. The reports marked with an (*) are issued separately and are only available at www.ncagr.com/stats. All others are included in the monthly release entitled "Farm Report". These reports are free and available by writing to: Director, Agricultural Statistics, P.O. Box 27767, Raleigh, NC 27611 or E-mail at: ncagstat@ncmail.net. Current and historical data series can be found at www.nass.usda.gov, and using the "Quick Stats" feature.

STATISTICAL REPORTS PROGRAM		
TYPE OF REPORTS	FREQUENCY OF REPORT	APPROXIMATE DATE AVAILABLE
CROP REPORTS		
Intentions to plant	Annually	End of March
Production of Field Crops, Fruits & Vegetables	Monthly (In Season)	9-12th
Grain Stocks (All Positions)	Quarterly	Jan. 10, End of Mar., June, Sept.
Annual Crop Summaries - Small Grains Other Field Crops	Annually	September 30, January 12
WEATHER-CROPS REPORTS	Weekly * (monthly: Jan. & Feb.)	Monday, 4:00 pm
LIVESTOCK REPORTS		
Cattle & Milk Cow Inventory, Jan. 1	Annually	Beginning of February
Calf Crop	Annually	Beginning of February
Hog and Pig Inventory and Pig Crop	Quarterly	End of Mar., June, Sept., Dec.
Commercial Slaughter	Monthly	20th
Meat Animals - Farm Production, Disposition & Income	Annually	End of April
DAIRY REPORTS		
Cows Milked & Milk Production	Quarterly	Mid-Jan., Apr., July, Oct.
Milk Production & Disposition	Annually	End of April
POULTRY REPORTS		
Broiler Report	Weekly *	Wednesday, 3:00 pm
Poultry Inventory, Dec. 1	Annually	End of January
Eggs, Chicken, and Hatchery	Monthly	22nd
Turkeys Raised	Twice Per Year	August 20, January 10
Poultry Production, Disposition, & Income	Annually	April 28
ECONOMIC REPORTS		
Prices Received By Farmers	Monthly	End of Month
Prices Paid By Farmers	Annually	April 30
Labor, Wage Rates	Quarterly	3rd Week Feb., May, Aug., Nov.

* Some counties not shown separately to avoid disclosing individual operations. ¹ These data provided are interpretations based on data collected from external sources and compiled by North Carolina State University. ² Included total income from farm and commercial forestry as estimated by County Extension Agents. The portion from commercial forestry is not included in cash farm receipts from farm marketings. A different data collection technique was used in 2005, but the totals are comparable to previous years. ³ This estimate includes both commercial farm ponds and marine seafood. Trout and catfish income from commercial farm ponds was estimated by County Extension Agents. The income from seafood was based on dockside value of the commercial catch at the point of landing, as estimated by Marine Fishery Services, U.S. Department of Commerce, Beaufort, N.C. Sums may not equal totals to avoid disclosing individual operations.

¹ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operators' share of income from the production's activities. The concept presented is consistent with the employed by the Organization for Economic Cooperation and Development. ² Included in value of crop and livestock production. ³ A positive value of inventory change represents current year production not sold by December 31. A negative value is an offset to production from prior years included in current year sales. ⁴ Includes machine hire and custom work, forest products sold, other farm income and gross insured rental value of farm dwelling. ⁵ Includes repair and maintenance of capital items, machine hire and custom work, marketing, storage and transportation expenses, contract labor and miscellaneous expenses. ⁶ Includes direct government payments, motor vehicle registration and licensing fees, and property taxes. ⁷ Includes employee compensation, net rent received by nonoperator landlords, real estate and nonreal estate interest.

NORTH CAROLINA 2006 ANNUAL WEATHER AND CLIMATE SUMMARY

January experienced warm temperatures and significant rainfall. By the end of the month, soil moisture levels were rated at 43% surplus. February was dry, and by March, soil moisture levels were down to 4% surplus and 69% adequate. Dry conditions continued throughout March and April. Consistent rainfall began in May, and soil moisture levels were rated at 51% adequate. Tropical Storm Alberto brought large amounts of rain to the Piedmont and Coastal Regions during the week of June 18th. Soil moisture rebounded to 29% surplus. Soybean, sweetpotato, and tobacco plantings were near the normal progress, while small grain harvest was slightly behind normal. In July, crop damage from Tropical Storm Beryl was reported in some coastal counties. August temperatures were above normal, causing heat stress to crops. By the week ending August 6th, soil moisture was rated at 1% surplus and 56% adequate. Corn and soybean progress was ahead of normal. During the week ending September 3rd, a Western cold front was followed by Hurricane Ernesto. Soil moisture increased to 32% surplus and 62% adequate. October temperatures were below normal. Small grain plantings and apple, cotton, soybean, and sweetpotato harvest were near normal. The year ended with heavy rainfall in November and record high temperatures in December.

¹ Revised. ² Preliminary. ³ Planted for all purposes. ⁴ Green-weight. ⁵ Production in 480-lb. net weight bales. ⁶ 2005 US price per cwt is derived from value of sales. 2006 is derived from value of production. ⁷ Includes estimated value of production for CT and MA type 61 in 2006. Used 2005 CT and MA type 61 price to compute the 2006 value of production. ⁸ Includes processing & fresh market.
