AGRICULTURE

NATIONAL AGRICULTURAL
STATISTICS SERVICE

PUBLICATION NO. 216

2015 OCT

Dear Readers,

Agriculture has been the foundation of our state's economy since its earliest beginnings, and it remains our No. 1 industry today. Food, fiber and forestry contribute \$76 billion to our state. Agriculture accounts for one-sixth of our state's income and employees.

I am proud of our farmers and others in the industry who work to keep our state moving forward in agriculture. There is no reason that agriculture cannot be a \$100 billion industry in the near future.

What does it take to be a \$100 billion industry? It takes support from our state's leaders; farmers and producers who provide high-quality products, and programs that support the growth of the industry.

One of these programs is celebrating its 10th anniversary this year. The Got to Be NC program is focused on raising awareness of North Carolina agricultural products among the public. Over the past 10 years, Got to Be NC has expanded into all of the state's grocery store chains. Many restaurants across the state also proudly display the logo to tout the fact they're serving North Carolina food on the menu.

The roots of this program actually go back 30 years. It's an extension of the Goodness Grows in North Carolina marketing program, which began in 1985.

Got to Be NC has 3,000 members representing farmers, ranchers, fishermen and food businesses across the state. We want the yellow and green Got to Be NC logo to be a symbol of quality in our state, country and across the world.

Our goal is that worldwide, consumers know that Got to Be NC means that it is grown, raised, caught or made in North Carolina, it's the best. You support North Carolina agriculture every time you buy local. Your support, along with the hard work and dedication of farmers, producers, small-business owners and agribusiness leaders, will be what grows agriculture to \$100 billion.

Thank you for your interest in North Carolina agriculture. This book gives detailed information on the many agricultural products found throughout the state, from field crops – such as corn, wheat, tobacco and cotton – to livestock and poultry. These numbers tell the story of just how important agriculture is in North Carolina.

Sincerely,

Steven W. Troxler

Publication No. 216. "North Carolina Agricultural Statistics" is an annual publication issued cooperatively by the USDA National Agricultural Statistics Service and the North Carolina Dept. of Agriculture & Consumer Services. This publication is printed on permanent, acid-free paper in compliance with the general statutes of the State of North Carolina. 3,000 copies of this public document were designed and printed at a cost of \$9,048.74, or \$3.01 per copy.

U.S. DEPARTMENT OF AGRICULTURE NATIONAL AGRICULTURAL STATISTICS SERVICE

Mission

The National Agricultural Statistics Service provides timely, accurate, and useful statistics in service to U.S. agriculture.

Overview

The USDA's National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture. Production and supplies of food and fiber, prices paid and received by farmers, farm labor and wages, farm finances, chemical use, and changes in the demographics of U.S. producers are only a few examples.

NASS is committed to providing timely, accurate, and useful statistics in service to U.S. agriculture.

To uphold our continuing commitment, NASS will:

- Report the facts on American agriculture, facts needed by people working in and depending upon U.S. agriculture.
- Provide objective and unbiased statistics on a preannounced schedule that is fair and impartial to all market participants.
- Conduct the Census of Agriculture every five years, providing the only source of consistent, comparable, and detailed agricultural data for every county in America.
- Serve the needs of our data users and customers at a local level through our network of State field offices and our cooperative relationship with universities and State Departments of Agriculture.
- Safeguard the privacy of farmers, ranchers, and other data providers, with a guarantee that confidentiality and data security continue to be our top priorities.

NORTH CAROLINA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

Mission

To provide services that promote and improve agriculture, agribusiness and forests; protect consumers and businesses; and conserve farmland and natural resources for the prosperity of all North Carolinians.

Overview

The N.C. Department of Agriculture and Consumer Services' divisions have responsibilities in regulatory and service areas covering agronomy; animal health; weights and measures; gas and oil inspection; crop and livestock statistics; USDA commodity distribution; state farm operations; food, drug and cosmetic testing for purity; agricultural marketing and promotion; agricultural marketing grading; international agricultural crop and livestock marketing; operation of the North Carolina State Fair and North Carolina Mountain State Fair; operation of four state farmers markets; research station operations; seed and fertilizer inspection; nursery and plant pest eradication activities; regulation of the structural pest control industry; agricultural environmental issues; soil and water conservation; forest management and protection; state and federal agricultural legislation; and agricultural economic analysis.

STATISTICAL REPORTS PROGRAM

The USDA's National Agricultural Statistics Service compiles current and historic statistics concerning agriculture in North Carolina. Where possible, information most often requested by farmers, the general public, and workers in government agencies are included. Reporting of crop and livestock statistics is a service provided to farmers and others in the State by the National Agricultural Statistics Service of the U.S. Department of Agriculture in cooperation with the North Carolina Department of Agriculture and Consumer Services. The collection and dissemination of agricultural statistics had its start in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were many advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. In 1919, the N.C. Department of Agriculture entered into a cooperative agreement with the U.S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture and Consumer Services. The USDA's National Agricultural Statistics Service publishes official statistics on North Carolina crops, livestock, prices, and various other agricultural items. The most requested reports and the approximate dates of releases are shown in the table below. These reports are free and available on the internet at www.ncagr.gov/stats, www.nass.usda.gov/Publications/index.asp, or by writing to: State Statistician, Agricultural Statistics, P.O. Box 27767, Raleigh, NC 27611 or E-mail at: ncagstat@ncagr.gov. Current and historical data series can be found at <http://quickstats.nass.usda.gov/>. For additional information regarding NC agricultural statistics please email ncagstat@ncagr.gov.

¹ A farm is any establishment from which \$1,000 or more of agricultural products were sold or would normally be sold during the year.

NUMBER OF FARMS AND LAND IN FARMS

2014 WEATHER SUMMARY

The year began with reports of below normal temperatures and abnormally wet conditions throughout the state. Much of North Carolina experienced extreme cold snaps, and periods of heavy rain and snow followed by unseasonably warm temperatures and dry conditions. On February 2nd statewide soil moisture was rated 0% very short, 3% short, 57% adequate and 40% surplus. This weather pattern continued into February and March as daytime highs were reported in the 70's and 80's and lows reported in teens and 20's. Small grain, corn and tobacco progress was behind due to weather conditions, and by week ending April 27th corn was at 60% planted compared to the 5 year average of 79% and flue-cured tobacco at 20% compared to 39% average. By May 25th topsoil moisture was rated at 1% very short, 18% short, 65% adequate and 16% surplus. June temperatures averaged above normal. Afternoon storms and a tropical front late in the month alleviated some of the dry conditions experienced in the piedmont region. Hurricane Arthur passed over the coastal area of the state on July 3-4. A category 2 hurricane that produced up to 5 inches of rain and wind speeds between 30-50 mph. Areas of the piedmont continued to report abnormally dry conditions. A cold front pushed through North Carolina the week ending July 27th bringing widespread rain totaling between 0.4 and 7.4 inches and temperatures ranging between 1 and 4 degrees below normal. These conditions continued throughout August until late in the month when temperatures rose to the mid to upper nineties in most areas. Corn, cotton and soybean progress looked to be on target with projected five year averages. By September, farmers were busy harvesting corn, sweet potatoes and tobacco. There was a major rain event the week ending September 14th. As of September 28th statewide topsoil moisture levels were at 1% very short, 9% short, 74% adequate and 16% surplus. October brought the first frost of the season in the mountains. Dry conditions aided harvest and by November 2nd farmers were on target harvesting all commodities and the planting of small grains. By the end of the December, sorghum and soybeans harvest was almost complete. Topsoil moisture levels were rated 0% very short, 2% short, 57% adequate and 41% surplus.

CASH RECEIPTS

DEFINITIONS & METHODOLOGY

Cash receipts for agricultural commodities are defined as the gross income from sales of crops, livestock, and livestock products during a calendar year. The USDA, Economic Research Service (ERS) uses USDA, National Agricultural Statistics Service (NASS) estimates to develop state level cash receipts. The county level cash receipts in this publication are based on the ERS state level cash receipts and various county data. To ensure respondent confidentiality, estimates at any level, including county estimates, are not published if those estimates would disclose any information about individual operations. More information about ERS and NASS data can be found at the following websites:

<http://www.ers.usda.gov/data-products/farm-income-and-wealth-statistics>

http://www.nass.usda.gov/Data_and_Statistics/

SOURCE OF FARM CASH RECEIPTS, NORTH CAROLINA, 2014

\$13,123,200,000

¹ All Other Crops includes hay, greenhouse, floriculture, nursery, cut Christmas trees, mushrooms and other miscellaneous crops.

COUNTY CASH RECEIPTS FROM FARM MARKETINGS, 2014

Includes Crops, Livestock & Government Payments

CASH RECEIPTS

¹ Cash receipts from farm marketings represent gross returns from the actual sales of crops and livestock products during the calendar year. ² Totals may not equal sum of counties due to rounding. *Cash receipts are not published for some counties to avoid disclosure of individual farming operations. USDA NASS County Estimating Program Policies and Standards apply.

¹ Excludes commercial broilers. ² Includes rendered, died, destroyed, composted, or disappeared for any reason except sold during the 12-month period.

HONEY

Production, Stocks and Value

Year	Honey Producing Colonies ¹	Yield per Colony	Production	Stocks December 15 ²	Average Price per Pound ³	Value of Production ⁴
	Thousands	Pounds	Thousand Pounds	Thousand Pounds	Dollars	Thousand Dollars
2010	13	46	598	144	2.66	1,591
2011	14	62	868	95	2.83	2,456
2012	13	39	507	106	3.76	1,906
2013	10	38	380	84	3.67	1,395
2014	12	43	516	88	3.47	1,791
US 2014 ⁵	2,740	65.1	178,270	51,192	2.16	385,241

¹ Honey producing colonies are the maximum number of colonies from which honey was taken during the year. It is possible to take honey from colonies which did not survive the entire year. ² Stocks held by producers. ³ Average price per pound based on expanded sales. ⁴ Value of production is equal to production multiplied by average price per pound. ⁵ Due to rounding, total colonies multiplied by total yield may not exactly equal production.
