

2025 North Carolina

AGRICULTURAL STATISTICS

North Carolina Department of Agriculture & Consumer Services

Hello,

North Carolina is one of the most agriculturally diverse states in the nation and the statistics captured in this publication from the National Agricultural Statistics Service provide an excellent snapshot of the variety of crops and livestock produced here.

It makes me proud to know North Carolina farmers can grow just about any crop and that our state continues to be a national leader in food and fiber production. It is also a point of pride that consumers all over the world enjoy the fruits of the labor of the hard-working men and women of North Carolina's agriculture industry.

The collected statistical information in this publication is important in helping guide agriculture policy and track production, demographics, and other land use trends. And, as we have seen over and over again this past year, these numbers have been critical in determining federal and state disaster assistance for 2024 agricultural losses.

The bottom line is this information is important in ensuring agriculture remains strong in this state and continues to be the economic engine powering our economy, but the numbers do not solely define North Carolina agriculture.

Our farmers and ag community are at the heart of this industry, and I see the extraordinary resiliency of our farming community as I have traveled around the state this year and see fields and farms in production.

Especially after the 2024 season, every farm and every crop represents a gritty determination and an unmatched pride in farming.

Farming in good times requires unshakeable faith and optimism, but farming through challenges requires you to dig deeper than you think is possible. So, when I see crops standing tall in the fields, it represents so much more than what we see on the surface.

I am proud of our farmers and our farming community. Our farmers help feed and clothe us, the nation and the world.

Please continue to support North Carolina farmers and agribusinesses by shopping local, visiting agritourism farms and supporting businesses using North Carolina foods and food products. We can all help agriculture remain our state's No. 1 industry.

Sincerely,

A handwritten signature in black ink that reads "Steven W. Troxler".

U.S. DEPARTMENT OF AGRICULTURE NATIONAL AGRICULTURAL STATISTICS SERVICE

Mission

The National Agricultural Statistics Service provides timely, accurate, and useful statistics in service to U.S. agriculture.

Overview

The USDA's National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture. Production and supplies of food and fiber, prices paid and received by farmers, farm labor and wages, farm finances, chemical use, and changes in the demographics of U.S. producers are only a few examples.

NASS is committed to providing timely, accurate, and useful statistics in service to U.S. agriculture.

To uphold our continuing commitment, NASS will:

- Report the facts on American agriculture, facts needed by people working in and depending upon U.S. agriculture.
- Provide objective and unbiased statistics on a preannounced schedule that is fair and impartial to all market participants.
- Conduct the Census of Agriculture every five years, providing the only source of consistent, comparable, and detailed agricultural data for every county in America.
- Serve the needs of our data users and customers at a local level through our network of State field offices and our cooperative relationship with universities and State Departments of Agriculture.
- Safeguard the privacy of farmers, ranchers, and other data providers, with a guarantee that confidentiality and data security continue to be our top priorities.

NORTH CAROLINA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES

Mission

To provide services that promote and improve agriculture, agribusiness and forests; protect consumers and businesses; and conserve farmland and natural resources for the prosperity of all North Carolinians.

Overview

The N.C. Department of Agriculture and Consumer Services' divisions have responsibilities in regulatory and service areas covering agronomy; animal health; weights and measures; gas and oil inspection; crop and livestock statistics; USDA commodity distribution; state farm operations; food, drug and cosmetic testing for purity; agricultural marketing and promotion; agricultural marketing grading; international agricultural crop and livestock marketing; operation of the North Carolina State Fair and North Carolina Mountain State Fair; operation of four state farmers markets; research station operations; seed and fertilizer inspection; nursery and plant pest eradication activities; regulation of the structural pest control industry; agricultural environmental issues; soil and water conservation; forest management and protection; state and federal agricultural legislation; and agricultural economic analysis.

STATISTICAL REPORTS PROGRAM

The USDA's National Agricultural Statistics Service compiles current and historic statistics concerning agriculture in North Carolina. Information most often requested by farmers, the general public, and workers in government agencies are included. Reporting of crop and livestock statistics is a service provided to farmers and others in the State by NASS in cooperation with the North Carolina Department of Agriculture and Consumer Services.

The collection and dissemination of agricultural statistics started in 1863. This is one of the oldest activities of the United States Department of Agriculture. It was recognized that there were advantages of a joint relationship between the State and Federal Governments in the development of agricultural statistics. In 1919, the N.C. Department of Agriculture entered into a cooperative agreement with the U.S. Department of Agriculture to provide detailed agricultural statistics. The agreement resulted in the creation of the Agricultural Statistics Division of the North Carolina Department of Agriculture and Consumer Services.

NASS publishes official statistics on North Carolina crops, livestock, prices, and various other agricultural items. The most requested reports and the approximate dates of releases are shown in the table below. These reports and more are free and available online at www.nass.usda.gov/Publications or by writing to: State Statistician, Agricultural Statistics, PO Box 27767, Raleigh, NC 27611.

Current and historical data series can be found at <http://quickstats.nass.usda.gov>.

For additional information regarding North Carolina agricultural statistics please email tony.dorn@usda.gov.

DEFINITIONS & METHODOLOGY

Cash receipts for agricultural commodities are defined as the gross income from sales of crops, livestock, and livestock products during a calendar year. The USDA, Economic Research Service (ERS) uses USDA, National Agricultural Statistics Service (NASS) estimates to develop state level cash receipts. The county level cash receipts in this publication are based on the ERS state level cash receipts and various NASS county data. To ensure respondent confidentiality, estimates at any level, including county estimates, are not published if those estimates would disclose any information about individual operations. More information about ERS and NASS data can be found at the following websites:

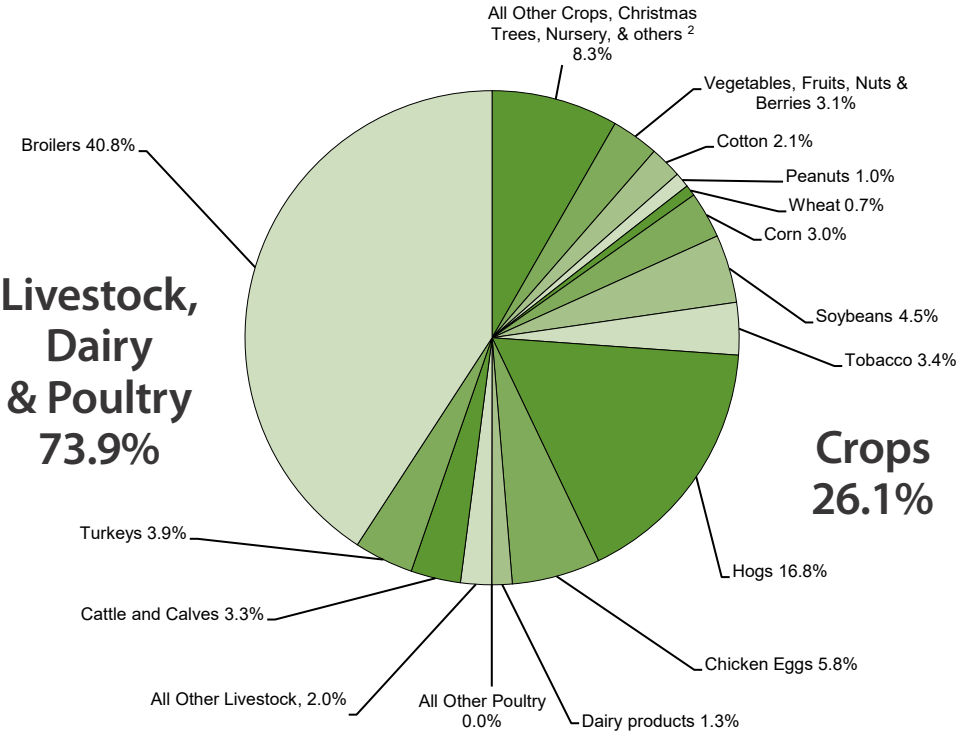

USDA Economic Research Service www.ers.usda.gov/data-products/farm-income-and-wealth-statistics/

USDA National Agricultural Statistics Service www.nass.usda.gov/Data_and_Statistics/

¹ SOURCE: Economic Research Service, USDA as of September 3, 2025. Note: Farm Forest Products are not included in cash receipts but are included in other farm-related income. Totals may not equal sum of states due to rounding. ² Amounts include cash payments made directly to farmers, not including Farmer-owned Reserve Payments as these data are not available by State. Amounts also include certificate exchange gains and marketing loan gains. U.S. government direct payments by program are net payments reflecting: (1) gross payments from the U.S. government to the farm sector; (2) payments returned to the U.S. government by the farm sector; and (3) accounting adjustments. A negative value indicates payments returned exceeded gross payments during the calendar year.

¹ Cash receipts from farm marketings represent gross returns from the actual sales of crops and livestock products during the 2017 & 2022 Census years. USDA NASS County Estimating Program Policies and Standards apply. ² Totals may not equal sum of counties due to rounding. ³ Data based on 2017 & 2022 Census of Agriculture Table 1 values. (D) = Cash receipts are not published for some counties to avoid disclosure of individual farming operations.

US 2024	166,478	181,794	1,054,839	29,513

¹ Excludes commercial broilers. ² Includes rendered, died, destroyed, composted, or disappeared for any reason except sold during the 12-month period.

HONEY

Production, Stocks, and Value

Year	Honey Producing Colonies ¹	Yield per Colony	Production	Stocks December 15 ²	Average Price per Pound ³	Value of Production ⁴
	<i>Thousands</i>	<i>Pounds</i>	<i>Thousand Pounds</i>	<i>Thousand Pounds</i>	<i>Dollars</i>	<i>Thousand Dollars</i>
2020	12	38	456	123	5.50	2,508
2021	13	39	507	96	6.69	3,392
2022	13	39	507	198	6.93	3,514
2023	11	44	484	179	6.52	3,156
2024	15	40	600	168	6.25	3,750
US 2024 ⁵	2,597	51.7	134,393	43,394	2.69	361,517

¹ Honey producing colonies are the maximum number of colonies from which honey was harvested during the year. It is possible to harvest honey from colonies which did not survive the entire year. ² Stocks held by producers. ³ Average price per pound based on expanded sales. ⁴ Value of production is equal to production multiplied by average price per pound. ⁵ Due to rounding, total colonies multiplied by total yield may not exactly equal production. United States value of production will not equal summation of States.

¹ Market hog weight groups have changed. The market weight group under 60 pounds has been changed to under 50 pounds. The market weight group 60-119 pounds has been changed to 50-119 pounds. Estimates have been made for these new weight groups dating back to March of 2008 at the US and state level using slaughter data and current import and export data.
