

AgWRAP Cooperator Acknowledgement

Baseflow Interceptor/ Streamside Pickup

Cooperator Name: _____

Date: _____

Phone: _____

County: _____

The following items provide important information regarding AgWRAP policies pertaining to Baseflow Interceptor/Streamside Pickup projects. The cooperator should read through each of the items and initial on the line to acknowledge that they have read and understand the information.

This form should be filled out with the assistance of local Soil and Water Conservation District staff and/or Technical Services Staff so that they may provide further explanation and answer any questions that arise.

_____ Cooperator is responsible for obtaining and complying with all required permits, including wetland determination by the ACOE, buffers on streams classified as trout (Tr) waters, and floodplain development, if applicable.

_____ The system must be certified by a PE.

_____ Livestock shall not have access to the pickup/interceptor area. Fencing must be installed to exclude livestock from this area and is cost shareable.

_____ Cooperator is encouraged to install water conservation measures and effective livestock exclusion fencing from streams, which is not cost shareable.

_____ Some types of water may not be suitable for irrigation, fertigation, foliar sprays, frost protection, rinsing, washing, ice, cooling, postharvest fungicide and wax, handwashing, cleaning and sanitizing of produce due to the Produce Safety Rule ([21.CFR.112](#)). Water may need to be treated before use.

_____ Cooperator is not allowed to begin work until Division approval is given for the contract.
