

Odor Control Management System

Definition/Purpose

An Odor Control Management System means a practice or combination of practices (planting windbreaks, pre-charging structures, incorporation of waste into soil, etc.) which manages or controls odors from confined animal operations, waste treatment and storage structures and waste applied to agricultural land. (DIP)

Policies

1. Cost share for odor control management systems is limited to structural and vegetative practices unless approved by the NCSU Animal and Poultry Waste Management Center.
2. Elements and items already a part of the Average Cost List may include grading, vegetation, pipe drops and surface inlets, animal guards, pipe and fittings. Components not listed on the average cost list shall be paid at 75/90% of actual cost with receipts up to the cap approved by the TRC Subcommittee for Waste Management Measures.
3. Each odor control BMP or a contract with an odor control BMP must be approved by the TRC Subcommittee for Waste Management Measures. The NCSU Animal and Poultry Waste Management Center must approve unproven technology or techniques prior to submission to the TRC for approval.
4. An approved waste management plan that meets NRCS standards is required for all contracts. The plan must be revised, if necessary, to meet any changes in the operation which alter the waste management needs of the operation.

ODOR CONTROL MANAGEMENT SYSTEM	
Maintenance Period	1 to 10 years depending on practices installed (documented in TRC Subcommittee approval letter)
BMP Units	EACH
Required Effects	ACRES_AFFECTED ANIMAL TYPE ANIMAL UNITS
JAA	Professional Engineer Or Applicable BMP such as: NRCS - ECS - 380 - Windbreak/Shelterbelt Establishment NRCS - ECS - 422 - Hedgerow Planting
NRCS Standards and Materials	NRCS Standards as required NRCS - ECS - 380 - Windbreak/Shelterbelt Establishment NRCS - ECS - 422 - Hedgerow Planting NRCS - ENG - 629 - Waste Treatment
CS2 Reference Materials	NC-ACSP-11 Signature Page Map with BMP location, fields, and roads Waste Management Plan TRC Subcommittee approval letter NCSU Animal and Poultry Waste Management Center approval letter (if applicable)

Agriculture Cost Share Program

Additional check Requirements	Spot-	All waste management systems for operations not permitted by the Division of Water Resources must be spot-checked annually for five years following implementation.
