

Cost Share Program Updates

CS2 Updates

Heavy Use Area Protection for Waste Management

In ACSP, the Heavy Use Area Protection (HUAP) BMP may be planned as a Stream Protection or Waste Management Measure. Previously, CS2 did not provide an option for contracting a Waste Management HUAP. This option is now available by selecting the “Heavy Use Area Protection (Waste Management Measure)” component from the BMP dropdown as shown below.

Once the appropriate component details are entered the Waste Management HUAP will show the correct Category as shown below.

Select	Tract	Field	Category	BMP	BMP Units	JAA	Component	Units	Amount	CS%	BMP Total	Funding Source
Select	1	1	WASTE MANAGEMENT	Heavy Use Area Protection (Waste Management Measure)	1.00 EACH	District	HUAP-fine grading, concrete (does not include grading/excavation)	50.00	\$2,888	75.00	\$2,888	CS
								Totals	\$2,888			

Well Component Updates

Supplements and repairs to previous year contracts are created using the original contract year average cost list. Previous year components are now available in CS2 with the notation “[FY2024 and earlier]”. For example, AgWRAP - Water Supply Well- construction/head protection [FY2024 and earlier].”

The AgWRAP, Stream Protection, and Agrichemical Facility Well BMPs have this option available for the following components:

- WELL-construction/head protection
- PUMP-housing, fiberglass/site built
- PUMP-solar powered water
- PUMP-water supply

Please be sure to use these “FY2024 and earlier” components when contracting well supplements and repairs.

ACSP BMP Update

Precision Agrichemical Application BMP ISO certification forms are now available.

- The Precision Agrichemical Application BMP [policy](#) requires documentation to verify system components meet “ISO 12188 - Tractors and machinery for agriculture and forestry — Test procedures for positioning and guidance systems in agriculture.”
- [Optional](#) ISO certification forms are now available for download by tier on the [BMP webpage](#).
- Districts may submit ISO documentation OR the certification form completed by the equipment dealer for JAA purposes.
