| (Comments from 8/9/07 inspection: Inadequacies that have been corrected: 1) 7) 10) 24)  
1) Support beams have been replaced and painted.  
Kennel door pipes have been replaced - chain link looks good.  
2) Temperature today is 71°F. Fans are being used. There is still no AC but new facility has been started and AC should be available there as well as heat, which is available at present facility.  
3) Space for dogs and cats is still an issue. There were 3 x 4 dogs per run. Puppies should not be housed with an adult unless it is the mother.  
4) A sink with hot water has been installed and is working in Kennel area.  
24) Records are now being kept on each animal as well as cage cards. Remember to keep details as to where animals came from and go.  
4) Kennel floors and walls still need to be painted.  
5) It is apparent that there needs to be more personnel to attend to the animals needs and keep the necessary records up to date.  
Today the facility is clean, animals well attended even though crowded, new doors to Kennel area have been installed. Very pleased with these corrections. A new addition next door (metal type building) is on order that should contain 60 runs. Completion date is unknown at present time.  
Will re-inspect in 45 days, and should be able to learn more frame on new facility. |
