**Item To Address:**

14. Sanitation of slotted plastic floors in the dog kennels. Today, there were areas of food stuck to the bottom of the slotted floors. I was advised today that these floors were only being hosed, not pressure washed. During today's inspection, Mr. Wayne Stewart, Health Director and Mr. Robert Meador, Maintenance Director, Mr. Ted Carter, Bladen Co. AG and myself observed pressure washing of the slotted floors. Because of the leaking floor pieces, some water is not able to be swepted and cleaned on the bottom. A new experimental maintenance is going to cut the flooring on 6 kennels to determine if this will enable the staff to separate and clean the bottom of the kennel floors. A follow-up inspection will be performed in 3 weeks to determine if the slotted floors can be separated and pressure washed twice a week and maintain the needed level of sanitation.
