<td>Follow-up from 8/11/10</td>
<td>1. Stainless steel cat cages are now positioned on a rolling metal dolly so new cages can be moved out to clean behind. 2. There are no space inadequacies in the cat room today. 3. A shield has been installed outside the pen next to the story room door. The shield will prevent wash water from reaching the metal door.</td>

Comments:
Temperature was 73°F at 1:30 PM.
No signs of illness or untreated injury.
Notes are now included on each animal's paperwork.

Items to be addressed:
14. Sanitation - Primary Enclosures - The slatted, plastic kennel flooring is still a sanitation inadequacy. There are a total of 36 K9 enclosures (Kennels).
Baden maintenance has cut the floors in all 36 Kennels. Only 4 Kennels' floor can be pulled apart and fully cleaned. The kennel will position in the other 32 Kennels prevents the floor from being pulled up. Thus, that can be pulled up are sprayed, soaked in disinfectant, and sprayed which takes approximately 30 minutes. One flat manure is stated that as of today, only 12 of the floors have been thoroughly cleaned. Today, a pen floor was pulled apart and examined. Hair and food matter was found in the inside and places that the manure was found. Cannot reach unless the floor is pulled apart.

Referring attached photos #1-4 (See 010931000001; 1007100001; 1007100004).
On 8/31/10, the maintenance supervisor and health director requested a meeting on this matter. The options of cutting the flooring and pressure washing versus a complete change to a concrete floor were fully discussed. Management requested the shelter staff be given a chance to see if it would be reasonable to take the flooring apart and pressure wash the pens. It has been 6 weeks and the shelter manager stated today that she still has only 1-2 inmates to clean. It is evident that with the multiple steps that must be taken and lack of personnel to carry out the cleaning routine that the management for this facility need to either employ more workers to clean pens or look at another type floor for these pens.

Shelter manager stated the health director & maintenance supervisor were already checking into installing a concrete floor.

Pen #5 - A screen needs to be replaced on the bottom of the guillotine clear frame.

Re-inspect in 30 working days (11/19/10)
