<td></td>
<td>Comments: Records are adequate. Pens are clean and food storage is adequate. Zero dogs or cats are being housed today. Transportation standards have been reviewed. The transport vehicle appears to be mechanically sound. The animal cargo space is clean and safe. There is no means to provide adjustable ventilation in the animal cargo space. Discussed transport requirements for primary enclosures for dogs and cats today. Recommend Town of Boiling Springs begin looking toward improving the transport unit. It is noted today that the existing pens are minimally compliant. The existing pens were built of wood-and-later-covered with wire to bring them into compliance. Recommend Town of Boiling Springs begin looking toward improving these pens. Discussed using heavy gauge chain link (to go) which is hard to destroy. Large breed, aggressive dogs must be housed in kennels that are escape proof and safe.</td>
