**Item Number**

7) Outside Holding Pens - The chain link needs attention. Make sure all wire is secure and wire used to make repairs with is safely turned down to prevent injury.

**Explanation of Inadequacy (circled items above) And Recommendation For Compliance**

Since last inspection the Director has installed a cross contamination barrier in the middle of the drain to prevent splashing from the back of one run into the back of the run on the back side. A new high pressure washer with heat is now being used in the Kennels. The cracks in the floors have been re-sealed. The shelter now vaccinates all dogs for distemper 4 hours before they are admitted into the shelter building. A set of outdoor holding pens have been erected to house those dogs who have just been vaccinated.

Temperature was 64°F at 8:30 AM.

There were no visible signs of illness or injury noted today.

Item #7 should be addressed before the next inspection.

**Date Corrections Must Be Completed**

Director plans to re-paint the Kennel floors within the next 8 weeks.
