| Complaint driven Inspection- Complaint #128 3 days in question; Ozzie, Sushi, and Sandy. On 11/12/2010, owners of these dogs Charles and Dorothy Gardner picked up their dogs from Silver Creek Kennels after they had been boarding since 10/26/2010. On 11/13/10, Ozzie was first taken to the vet where the symptoms were high fever, loose stool, and vomiting. On 11/16/10, Sandy was taken to the vet with same type of symptoms. On 11/18/10, Sushi was taken to the vet with same symptoms, and was very dehydrated. Sushi being the oldest of the 3, on 11/18/10 I called the vet, and he confirmed all of these symptoms (clostridial bacteria). Contaminated food or water can cause these symptoms as well as it can be carried on cloths or hands or feet. During inspection on 11/19/2010 and walk through of facility, one of the pens was in kennel area and all other runs had been cleaned and had fresh bedding in them. There was little odor. Floors were dry and was above norm. All food was stored in sealed containers at facility or in another location if in unopened bags.
| #9 Floors and walls need to be resealed/chainlink needs to be repaired on gates and in some areas between primary enclosures.  
#25 All Shot records must be kept on site for all animals for a period of one year.  
#14 Tops of primary enclosures need to be cleaned and free of dirt. Above Items (re-inspect in 30 days)
