Inspection 8/27/10 - I arrived at the facility at 11:00AM with the concern of the illness that is in and has been in the facility for the last 2 weeks. Upon arrival, the shelter is now closed to the public and an emergency shelter has been set up in Parking Lot outside the facility. Strays and bite Animals are being housed in this area until shelter is completely cleaned. Sanitize and air handle system is cleaned and relocated in certain areas to prevent cross contamination.

Samples - Blood and Nasal Swabs have been sent to Cornell University and Oklahoma State University for testing and should have results by 8/31. Symptoms of this illness are similar to canine influenza, but continue to get worse as time moves forward. Dr. Marty Hartnell began testing around 3 weeks prior to the major outbreak that happened this week.

43 dogs & 69 cats still remain at the facility as of 8/27/10; before arriving at the shelter 11 dogs and 18 cats had already been euthanized earlier that morning because of severe symptoms related to the illness. During a walk through of the facility, I noticed animals with symptoms of this illness. Every effort to maintain clean and sanitize every inch of this facility was in process during my inspection. And every effort to maintain an emergency shelter was in place and being run very professionally.

<td>Areas noted on 1st page of inspection report marked * these areas are being addressed throughout the facility. This does not mean in any way that this facility is in a failing grade; its just noted that each of these areas are being addressed with extreme measures to assure that when the facility reopens that this type of illness to the best of the employees at Catawba County Animal Shelter does not happen again. Again all areas within and outside this facility is being handled by staff in a very professional manner. A follow-up inspection of this facility will be conducted after the reopening and after all improvements have been complete.</td>
