<th>Date Corrections Must Be Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>1) Plywood barrier wall which separates the public from the dogs needs to be painted (sealed) to prevent moisture absorption from the kennel and floor cleaning. Wood is an absorbable material that needs to be sealed when in an area that is subject to being wet.</td>
<td></td>

7) Kennels #3 - Hinges need attention - to be re-set in a solid portion of the wall or repaired in such a manner so as to remain secure. All kennels - there is a space at the bottom of each door large enough for puppies or small dogs to either escape or get caught. Need to look at hanging doors so there is no way to have either of these potential problems. All kennels - when the chain link is repaired the repair wire needs to be applied in a manner that does not leave it turned up for a dog to injury itself - example is to tear a foot pad.

Cat cages with wire bottoms - provide a solid resting surface such as an empty litter pan or folded newspaper or towel.

Remember to keep any areas in the exercise yard that have bare dirt covered in 6 inches of gravel or concrete - no bare dirt.

Records have been reviewed and are in order.

No sign of illness or injury noted.

No euthanasia inspection was performed today. At this time all dogs and cats to be euthanized are taken to the Crawford-Pamlico Shelter. Nolensville AC is currently working toward performing EBI at their facility.

Conditionally Approved contingent upon addressing the above items.

Re-Inspection in 30 working days.
