<td></td>
<td>Today's inspection is to investigate a complaint concerning a Spitz mix puppy that was sold on March 19, 2020 to Mrs. Carly Ricciardelli by Aqua-Roma Pet Center. This puppy became ill and was taken to the Manchester Animal Hospital in Fayetteville on March 22, 2020, and admitted, was diagnosed with Parvovirus, and treated for Canine Parvovirus. Admission date was March 23, 2020. In a phone interview, Dr. Rodriguez stated the puppy came to the hospital with a fever, vomiting, diarrhea, and runny nose. The Parvo Test performed showed positive for Parvovirus and a fecal test showed a heavy infection of round worms. The puppy was treated for Parvovirus and internal parasites and has now been released.</td>

Comments:

The records on this and its litter mates have been examined today. Intake date was 3/16/10 on all 3 pups. The pups were given their Distemper, Parvo, Parainfluenza, and Rabies vaccines and dewormed on 3/10/10. Sale date was 3/10, 3/14, 3/19. There was no isolation/quarantine period for these pups.

The store owner stated he has not had any reports on the other 2 litter mates being sick.

The records of all the dogs in the store were examined today. Records showed shots and deworming were administered on intake and there is not a quarantine time before offering for sale.

There were no visible signs of illness in any of the dogs today. There were resting pads available and food and water. The dog enclosures were clean.

| Items that need to be addressed:  
Re: Records (25) Vet Treatment - Medications - Need to record dog's age, weight, and the amount of dewormer administered. Record name of dewormer.  
Veterinary Care (30) Isolation - Isolation is available, but owner does not follow a policy of isolating new dogs or cats before offering for sale. There is a history of complaints at the store concerning the sale of sick dogs. Discuss with owner the need to isolate and advised safety to his vet for guidance on time period to isolate. Also advised owner to discuss antiviral products to use that will kill the canine and feline viruses they could encounter.  
On the follow-up inspection request owner to provide a written cleaning protocol from his vet as well as written procedure for isolation of incoming or sick dogs or cats.  

Follow-up Inspection in 30 days (May 3, 2010)
