| Upon entering the inside Kennel room I observed dirty Kennels again (a problem from a past inspection in '09). Very strong bleach fumes - that made my eyes and sinuses burn. A set of lights not working half of the Kennel doors disassembled, trash under the feed tables and tub along with lots of rodent droppings. A hole in the wall under the tub had not been closed. The bathroom had a pile of dried feces and vomit from a cat in the floor. When turned loose the grey and white cat began eating the dried vomited food. The grey and white cat did not look healthy and appeared very hungry. Temperature were in range inside in all areas at 3:00 pm. Door molding are chipped and chewed in the cat room, door to K-9 Kennels has damaged molding, too.
| I advised Jason that this was unacceptable procedure in operating a public boarding kennel. That the animals owner entrusted him to care for them according to the Animal Welfare Act. Much evidence has been seen and noted. To prove the personnel at this facility are incapable of performing the necessary tasks required to care for these animals. |

In reference to the complaint, none of the animals present today had any of the described lesions or soaked feet, but it is apparent the personnel at this facility are lacking in experience or care in husbandry area of this business.

I was on site Verby from 9:30 AM to 3:00 PM.
