<td></td>
<td>This investigation today is an reference to a complaint filed on 7-30-07 by Kim Lloyd, President of D.A.R.T. (Duplin Animal Rescue Team). Ms. Lloyd claims the supplies she takes out of the shelter for re-adoption are getting sick with Parvo as a result of the conditions at the shelter. Upon this investigation I saw one puppy that was approximately 3 months old and had been at the shelter for 9 days. It was showing no signs of illness. There were 3 other puppies that had been there 9 days that were showing no signs of illness either. Chris Sumner, the manager, reviewed his disease prevention and control protocol with me. The runs are steam cleaned and sprayed with clorox. Food and water bowls are hand washed with hot water, detergent and clorox. I did not see any dogs or cats today that were showing any signs of illness. I did find the shelter is in violation of 08.NCAAS 335.0202 Indoor Facilities - See as follows: a) Indoor housing facilities for dogs and cats shall be adequately heated and cooled when necessary to protect the dogs and cats from cold and excessive heat and provide for their health and comfort. The ambient temperature shall not be allowed to fall below 50 degrees F. or exceed 85 degrees F.</td>

<td>portion of the building. They have 2 ceiling fans but no heat or air conditioning.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>It appears the personnel at this shelter are doing a very good job but cannot do what they must do because of lack of a building that meets regulations.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>The building is clean, some paint is peeling in the Kennel area due to cleaning, the dogs and cats look healthy, food and water is available and the records are in order. Euthanasia is done injection.</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Will re-inspect in 30 days and expect a time frame on installing heat/AC and cross-contamination barriers.</td>
<td></td>
