<tbody>
<tr>
<td>Follow-up from 12/19/07</td>
<td>Since 12/19/07 a small electric heater has been used in the cat room - temp. was at 9:30 AM is 50°. Cross contamination barriers are being installed - not complete yet.</td>
<td></td>
</tr>
<tr>
<td>1)</td>
<td>Cross contamination barriers still need to be completed.</td>
<td></td>
</tr>
<tr>
<td>2)</td>
<td>Temperature in main kennel is 64° at 9:30 AM, 48° in the quarantine room with one dog being quarantined until 1-27-08. Shelter attendant had a small electric heater that was placed in the quarantine room. Cat room was 50°. Strongly suggest placing thermometers at dog level to get a more accurate reading for where animals are housed. The quarantine room badly needs some type of heat supply besides a small electric heater - not enough.</td>
<td></td>
</tr>
<tr>
<td>3)</td>
<td>Dog in quarantine room appeared cold - no bedding is available only I a resting surface.</td>
<td></td>
</tr>
</tbody>
</table>

It is noted that shelter management is trying to meet AW Regulations but still need to address the above issues.

Shelter Manager not available today - out sick. Will contact by phone and discuss time frame for correcting above items.
