	<u>I performed a courtesy inspection on 6/1/06. At that time the following issues were addressed. One issue was the lighting in the kennel area and this has been fixed. The temp was 70° in the kennel area. The dogs and cats had nesting pads in their cages. The food was stored in plastic containers. The food's water basins are stainless steel. The isolation area is good condition. There were no signs of insect or vermin. The water drainage is good. This shelter is in good shape. All records were correct with all information.</u>
