Item Number	Explanation of Inadequacy (circled items above) And Recommendation For Compliance	Date Corrections Must Be Completed
	Today's inspection is a follow-up from 1-29-09.	
	Items that have been addressed:	
1.	Cat Cottages - The problem with the worn linoleum in the cat cottages has been partially addressed. The owner stated that the concrete sealer they have tried has been un-workable. Most of the cottage floors have been stripped of the old linoleum but there are one or more that need to have the worn replaced or removed and sealed.	
2.	Two thermometers for each isle of the horse barn were purchased this morning during the inspection and placed in the needed areas.	
3.	Outdoor dog pens - sealer has been applied to some of the cracks.	
4.	Fencing that was questioned about being under 5 feet - measures 53 inches but there is a 6 foot high perimeter fence surrounding these pens.	
5.	Cat trees and scratching posts have been limited to closed groups.	
	Items still to be addressed:	
2) 9	Horse Barn Area - Owner stated she will be moving all of the dogs and cats out of the horse barn isles by August 1, 2009 into the yellow building. Stalls for the dividing walls were up today. Remember indoor facilities must be kept between 50° and 85°. Hospital/Isolation Building does not have any electricity today. Owner stated the electrician had been notified. Doors were open for air flow. Thermometers should be used here as well.	
3)	Lighting - Horse Barn Isles where cats and dogs are kennelled. Owner stated that portable lights would be used until dogs and cats are moved to yellow building Aug. 1, 2009. Lights were not available today.

Item Number	Explanation of Inadequacy (circled items above) And Recommendation For Compliance	Date Corrections Must Be Completed
6)	Water Drainage - Same problems as before except there were no dogs housed in pens with standing water. Advised owner that between the sets of pens attention is needed with hair buildup and scum where water has stood.	
7)	Outdoor dog pens - There are still many pens that are gravel or gravel, concrete combined that the gravel needs to be built up and the holes filled. Any chain link that is loose or in poor repair must be repaired or replaced. Wood under cat cages needs to be changed to a non-wood material	
17)	Rodent Control was an issue on the 1-29-09 inspection. Today more bait stations were noted and no rat sign observed but the fly problem has been noted. The owner stated she is addressing that by using the fly predator system. Advised owner to continue working on this item. As I write this, fly bags were bought and being placed.	
Comments:		
Discussed with owner the need to number all permanent enclosures. Remember to provide 1 litter pan per 3 cats. Discussed the use of self feeders again and advised owner I would get back to her with an answer.		
Re-Inspection in 60 days
