OWNER:
ADDRESS: 
TELEPHONE: ________

Item Number | Explanation of Inadequacy (circled items above) And Recommendation For Compliance | Date Corrections Must Be Completed
--- | --- | ---
Follow-up from 7-8-09
Items Addressed:

1. Primary Enclosures - Inside Kennels - All of the damaged shower board has been removed from the kennel walls. The kennel walls have been cleaned, sealed and re-painted. All of the dogs were removed from these kennels and housed in temporary kennels provided by CAMET.

2. Grounds behind the "Best Camp Kennels" - A plastic (pvc) pipe was cut in half and attached to the back of the concrete pad. A mesh material was placed on top to catch the hair. This has improved the sanitation behind the kennels.

Comments:
Shelter has added a new pen in the concrete common area. Part of these are designated for Animal Control drop off dogs. Advised shelter to provide an additional dog house in these pens when the weather is cold.
The shelter is supplying the dogs with coats for any upper respiratory infection. Kennel cough with the dogs. Advised shelter to consult their vet on the correct viricide to use.
The shelter has added a cage dryer and refrigerator since the last inspection.
It is apparent the shelter is working hard to make the necessary repairs and improvements to stay in compliance with the AW regulations.

Items to Address:
24) Description of Animals - Many records were found that showed little to no attention to putting an accurate description of the dog or cat. This is failing to Animal Control whose intake paperwork is inadequate. Discussed with management, work on being more specific.
26) Origin - Same as 24) Work on being more specific.
These items should be discussed with personnel and start improvements right away.
