Follow-up from 9/14/07

Items Addressed:
1. Policy & Procedure Manual is now complete.

Items to be Addressed:
1. Structure & Repair - Building: This is the second time this item has been marked as inadequate. The hallway side of the Chemical room - the air wall is damaged from a leak in the Chemical room. The leak has been addressed and the inside wall repaired by the Plumber. The County maintenance department is supposed to fix the hallway wall and a portion of the cat quarantine room wall. The shelter director has expressed his frustration over the amount of time it is taking to get these two areas repaired. Let it be noted that the shelter will receive a disapproved rating on the next inspection if these two areas are not completely addressed.

Comments:
The shelter director is having all of the guillotine ropes replaced with cables enclosed in plastic.
The shelter has encountered a roach problem. Professional Pest Control is working with the shelter to eliminate the roach problem. The director stated that no dogs or cats have any contact with any pesticide that is used.
Remember to keep all burned out lights replaced as needed.
There are 5 litters of young puppies housed with their mothers at the shelter today and it was evident they have been well cared for given the length of time they have been in that environment.
Temperatures were in range in all areas of the facility today.

Approved
