Follow-up from 1/13/10

**Items Addressed:**

1. Outside Kennels - gravel has been dug up and concrete drains have been installed at each of the outside dog kennels.

2. Inside Kennels - #9 > 12 - The leaning kennel walls have been straightened and made secure.

3. Inside Kennels - All guillotine ropes have been replaced with new cables.

4. #19 Inside Kennel with damaged shower hose has been fixed.

**Comments:**

At the time of inspection today, work was continuing with the kennel drains. A front end loader was being used to move dirt and pipes will be installed to carry the waste water to a drain field further from the kennels. Then what was used in the past. Hair traps are on site and going to be installed this week.

Block has been laid at all of the Kennels to prevent cross contamination. Maintainers will paint the block to seal them.

The ceiling has been lowered in the quarantine room (K-9 & Feline). This has improved the heat and cooling of these rooms.

Discussed lowering the ceiling in the inside K-9 kennel area. Temperature was 72° at 12:30 pm today.

**Item to Address:**

2) Upper chain link on inside K-9 kennels (outside wall). Discuss replacing with new panel which would harder to destroy.

Shelter has worked very hard correcting drainage problems.

**Approved**
