Item Number | Explanation of Inadequacy (circled items above) And Recommendation For Compliance | Date Corrections Must Be Completed
---|---|---

Today's inspection is a follow-up from 5-14-09.

Items that have been addressed:

1. All chain link is in much better repair today. Shelter does need to continue to regularly check for damaged wire and keep it repaired in a safe manner.
2. All outdoor pens now have shade protection (New tops).
3. Caroline Exterminator is now doing pest control. There were some dead barge found which shows the insecticide is working. Recent bait boxes were found in the shelter.

Items that still need to be addressed:

1. Outside Kennel Area - As before, the ground is holding hair which attracts flies and causes odors. Some areas water is standing. Attendants have worked to remove the hair but it is very difficult to maintain good sanitation with this problem. Two options have been discussed - install concrete chain troughs or PVC pipe cut in half and placed against the concrete pad. Shelter Manager Darlene Clawson plans to show county maintenance a kennel with the concrete drain trough and determine how the shelter can reasonably solve this problem.
2. Welded wire at cages - Those with wire protruding on the inside need to be repaired or replaced.

Comments:

Temperature was 71°F at 9:45am. Cleaning is in progress at time of inspection. Remember to provide 1 litter pan per 3 cats.

Inspection Conditionally Approved contingent upon addressing the above items. Re-inspect in 90 days (working days)
