Item Number	Explanation of Inadequacy (circled items above) And Recommendation For Compliance	Date Corrections Must Be Completed
(6), (7), (10)	The tarps are full of water that cover the dog kennels. The water must be drained after each rain but it would be better to install some type of frame for the tarps so that water does not collect and there will be adequate shade and rain protection.	
(17), (20)	Food was stored in an open area. All opened bags of dry food must be stored in a closed container. Covered food cans had molded food caked in the bottom. The food storage should be in an area that does not have access to direct sun light as it will collect moisture and then the food will mold.	
<p>Today's inspection is Conditionally Approved upon addressing the above items - discussed all w/Chief McDowell.</p>
