--- | --- | ---

1. Harrell and I performed an inspection today at the Rockingham County Animal Shelter. There was a complaint received about the condition of the shelter relating to the ambient temperature of the kennels. The other complaint was during the cleaning process, the dogs got soaked.

This shelter would be considered an indoor and outdoor facility. The shelter has tents on each side that are pulled down depending on weather conditions. At today's inspection, the tents were up allowing air to flow through the shelter. The shelter recently had a Parvo outbreak, and the attending veterinarian who provides the veterinary care Dr. Kindgarn suggested the tents should stay up.

There were several inadequacies that need to be addressed:

2. #7 There are several cages with the wire needs to be repaired. There is wire protruding inside the kennels.

3. #7 This facility would be considered an indoor and outdoor shelter. There needs to be a dog house in each pen. (The temperature at 10:30 a.m. on 2/7/08 was 44. The tents were up this morning when the temp was down.) The dogs need a resting surface. The dog house would provide both issues.

4. #7 The cat cages also need resting surfaces in the cages.

5. #14 The kennels in the back areas need barriers installed to prevent cross contamination between kennels.

6. #12 There was some odor upon entering the shelter but once the door was latched, the odor and the odor-Left quickly.

| #26         | On the impoundment sheets from the City of Reidsville and Rockingham County Animal Control, the impoundment sheet should indicate what community or town the animal was picked up.  
The shelter staff needs to remember to move the dog out of the kennel before cleaning. The animal should be returned once the kennel floor is dry.  
We need a timeline as to when one Reidsville Animal Hospital to consider this an indoor or outdoor facility. We feel 30 days will be an ample amount of time.  
All other issues addressed in this report need to be completed within 30 days.  
The cross contamination barriers are a bigger project which needs at least 60 days to be addressed. |
