On previous inspections, with the lack of personnel at this shelter, it is evident that when only one attendant is working, there needs to be equipment available to better handle wildlife intake. There is a sanitation problem when a cat cannot be removed from its cage.

At 11:30 AM, this cat had not been cleaned. During this inspection, the cat was removed from its cage, fed and watered.

21) **Personnel** - There are still only 2 employees at this shelter. Employment began at 6:15 AM. Both employees were cleaning.

On the initial inspection, Sheila Dinda, Senior Handler stated she would have on site director and a full time employee hired within the next 6 weeks. As of today neither have been hired. Mrs. Hradek has held interviews but no one has been hired. Suspected to Mrs. Hradek that she meet criteria those employees already associated with the shelter that has shelter and animal control experience.

Overall, the conditions of the shelter are improved but other areas such as sanitation in the kennels and keeping the daily record logged into the computer that indicates more personnel are needed.

It has been noted that new resting surfaces/platforms are being used. 

Chi chamber and screening areas are clean today.

No signs of untreated illness or injury noted today.

Re-Inspect in 30 working days.
