29. No Signs of Illness/Treated

Item Number Explanation of Inadequacy (circled items above) And Recommendation For Compliance Date Corrections Must Be Completed

I performed a courtesy inspection on 6/10/96 at that time I addressed 2 dogs located outside that were chained up. Those dogs are gone. There are still cracks in the concrete. The cages for the cats are old and they are laying on wood flooring. This has been corrected by putting down linoleum. There are several issues that need to be addressed. There is only 1 dog pen. The dog pens are large and each pen has at least 5 to 6 dogs in some pens. The structure on the outside roof. The kennel is made of concrete and is coming apart. The dogs need something for resting pads. Dog bowls are in food bowls. There is no heating/cooling. Need more lighting in the kennel area. There is no sink in the kennel area. To clean food/water bowls. The bowls are removed and taken out back to clean. Some signs on I suspect vermin. Need more water containers. The cages in the back of the shelter need to be in better position.
